

THE SECRET OF WORLD CLASS FURNITURE: PEEL Ply PLYWOOD

What actually makes good furniture is the quality of the material used for the construction. Amongst all materials used, it is regarded that plywood is unbeatable in strength and durability. The common belief is that Plywood is even stronger than steel in static binding strength.

HAVE A LOOK AT THE ELEMENTS THAT MAKE ALL THE DIFFERENCE IN PEEL Ply CONSTRUCTED FURNITURE:

RAW MATERIAL

Made from mature Burmese Gurjan wood , the veneers that make the layers are assured to be single layered. As a result, there are zero gaps and overlaps. This in turn increases the longevity of the furniture by a huge margin.

ELEGANCE AND BEAUTY

Furniture made from pure Gurjan plywood has a rare and rich natural reddish brown hue that is probably one of the best colors that exists. Architects and designers prefer this natural beauty over any other material.

DURABILITY

The famous museums all over the world have preserved ancient furniture made of plywood. Such is the immense durability of furniture made from PEEL Ply plywood that survives the decay of time without any spec of damage.

VERSATILITY

PEEL Ply designs plywood that is crafted to meet every expectation perfectly. Furniture of the most complicated designs can be easily given the perfect shape by PEEL Ply plywood without any compromise on strength.

RESISTANCE

Furniture made from PEEL Ply plywood is 40% more resistant to shocks. To top it all, these plywood are water and fireproof. Along with this, comes an added bonus of Gurjan being a natural resistant towards termites and borer.

Style is defined by quality. When there is the best that is available why settle in for just the good. Give your home the quality it deserves with furniture from PEEL Ply plywood.

QUALITY THATS NOT PRICY
